INTRODUCTION

ABOUT this GUIDEBOOK & Your Trip

If you're looking for information on the history of the Okefenokee, or a deep dive into the regional flora and fauna, look elsewhere. Let's face it, while that type of information has its place, when you're on the water in a strange, far-from-home wilderness, you want to know where to paddle, how long it should take, what to expect along the way, and where to pitch your tent or hammock for the night. This is what you'll get with this book. What follows is intentionally concise, written by an experienced paddle-camper for other paddle-campers.

Although you don't have to be an expert, tenured paddle-camper to venture into the Okefenokee, it should not be your first trip of this type, and you must do your homework. A backcountry wilderness trip requires study and preparation, reading guidebooks, pouring over maps, talking to Refuge staff, watching videos and checking weather reports. **Bottom line - be prepared. Be overprepared.** You should always assume you're not going to have cell phone service, and no one is coming to save you - at least not right away!

SAFETY CONCERNS in the Okefenokee

Primary safety concerns are the same as any other type of outdoor activity:

- Bring more drinking and cooking water than you think you'll need. Due to heavy sediments and high tannic acid, filtering/purifying Okefenokee swamp water is not recommended.
- Have ample protection from sun exposure - sunblock, long sleeve shirt, long pants and wide brim hat.
- Biting insects can be formidable, even in cooler months.
- Share your put-in/take-out location, paddling route, launch and return times with family and friends.
- It's always a good idea to bring a buddy along with you. Share your awesome Okefenokee experience with someone else.
- Do your homework on the route, conditions and where you're camping. Know how to use and practice with your gear.
- Be prepared for long, arduous days of paddling and sitting in your kayak/canoe. Once you get on the water, there are not many places to get out, stretch your legs or use the bathroom.

INTRODUCTION

Alligators

Without fail, alligators are the number one concern asked about when discussing Okefenokee with newcomers. Let's get one thing out of the way: you will see alligators. There are lots of them. However, after thousands of miles paddled in the deep Southeast and the Okefenokee, I can assure you that alligators are not a concern.

Here's the best advice I can give you: just don't make a big deal about alligators. They don't want anything to do with you. Use common sense. Treat alligators with the upmost respect. Never feed an alligator, or any wildlife! Never approach them on purpose, and just paddle on by, giving them the widest berth possible. You will be fine.

PFD's or "Life Jackets," and Whistles

Georgia law states each person must have a Personal Flotation Device (PFD or "life jacket") in the kayak or canoe. Children under 13 are required to wear their PFD when in a kayak or canoe. It's recommended that everyone always wears a PFD when paddling. In addition, it's recommended that each person have an emergency whistle attached to their PFD.

Water Levels & Currents

Rising water levels and extreme low waters can be a concern for some Okefenokee trails; low waters - especially on the east/northeast side of the Refuge in colder months. The Refuge authorities will close waterways at times and/or advise about water level concerns. Be sure to ask about this when making camping reservations and call a few days before your trip to check water levels.

The water is moving and there are slight currents in the Okefenokee. Although it is not usually too much of an issue, depending on water levels and recent storms, currents can be challenging on some narrow trails. Know your paddling limits and study the trail descriptions on pages 21 - 41.

CAMPING PERMITS

There are ten backcountry, waterway-camping locations in the Okefenokee. Seven of these are on platforms built over the water and two are on islands / land. Camping permits can be made for anywhere from one to four nights. One- and two-night permits are only available during peak season, which is March 1 - April 30.

To Make a RESERVATION: Call **912-496-3331** between 7 a.m. and 10 a.m., Tuesday through Thursday EST, excluding federal holidays. Reservations can be made 2 months in advance and can only be made by phone. Fees are charged for camping.

Before calling for a camping permit, you must set up a profile in **Recreation.gov**. Only one party is allowed to camp at a site for a night, and permits are limited to 20 people. Only canoes and/or kayaks are authorized on overnight wilderness camping trips; no motors of any type are allowed. Pets and swimming are prohibited. Leave no trace; pack it in, pack it out.

Open fires are permitted only at Canal Run, Mixons Hammock and Floyds Island. Fire rings are provided at these sites.

Camping rules and permit fees are subject to change. Review camping information on this webpage before you call the Refuge:

Orange Trail

Paddled this Trail Date: _____

Paddling the beautiful Orange Trail, a couple of miles beyond the SCRA.

General Location	It's the long trail that cuts across the Refuge in east ↔ west direction. Includes the Suwannee Canal.
Connects	Suwannee Canal Recreation Area to nearly Stephen C. Foster State Park. Connects to the Yellow, Pink, Blue, Purple, and Red trails.
Length	16 miles.
Difficulty	Moderate to Canal Run, due to distance. Moderate to difficult from Canal Run to Billys Lake, due to tight paddling and strong currents.
Features	11 miles of canal, then narrow twists/turns from Canal Run to Billys Island. Lots of tall, eerie, picturesque trees with Spanish moss.
Shelters	6 miles from Suwannee Canal Rec. Area is Coffee Bay (p. 54) camping platform. Canal Run (p. 50) camping platform is 10 miles from Suwannee Canal Recreation Area.

- Current** Gently flows west towards Stephen C. Foster State Park.
- Precautions** During times of low water levels, the narrow twists/turns between Canal Run and Billys Island can be difficult.

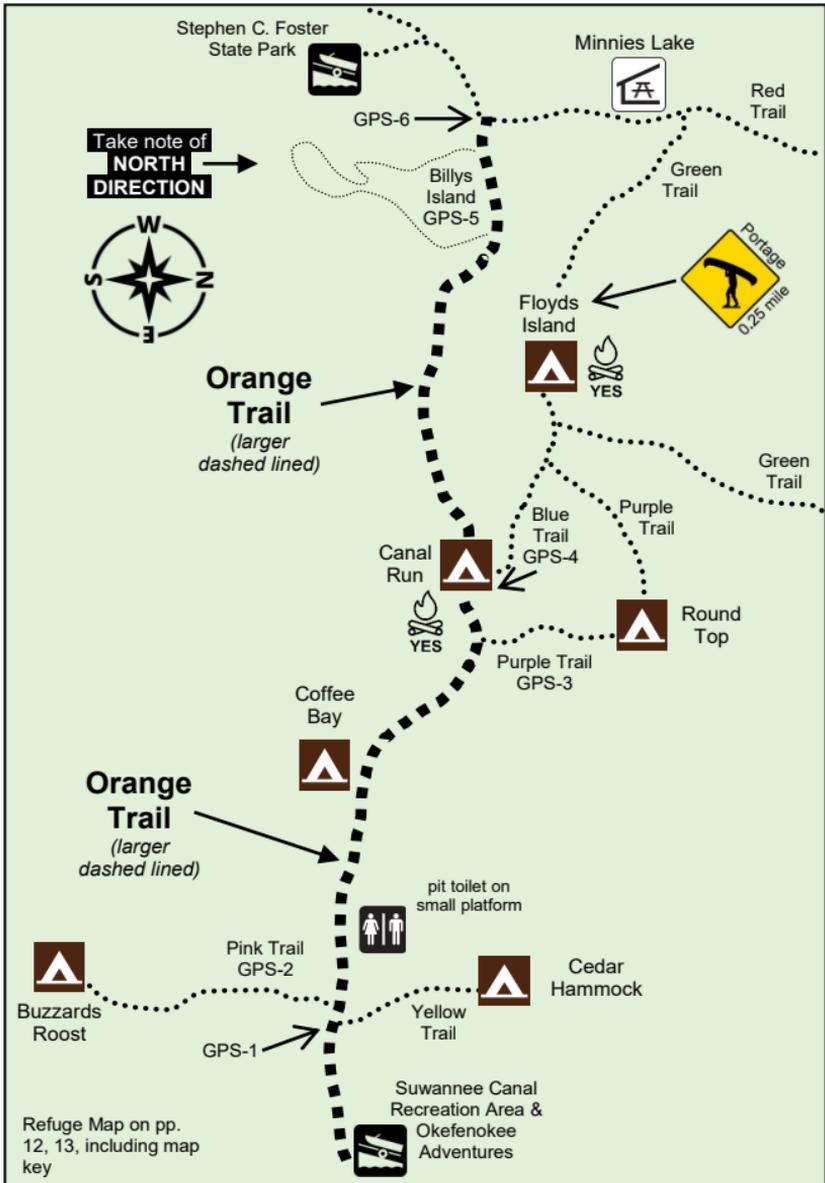

It's all smiles on the easy-going Orange Trail / Suwannee Canal.

Red Trail

Paddled this Trail Date: _____

On the Red Trail between Minnies Lake and Big Water.

General Location	Covers the remote north part of the Refuge, Suwannee River watershed, heads southwest to west-central part of the Refuge.
Connects	Begins at Kingfisher Landing, ends at Billys Lake and access to Stephen C. Foster State Park.
Length	30+ miles.
Difficulty	Very strenuous. Long days of paddling on this trail.
Features	Just about every type of feature in the Refuge; prairies, grasslands, wide river basin, narrow twisties, gorgeous cypress trees. You'll experience it all on this trail!
Shelters	Maul Hammock (p. 58), Big Water (p. 44), Minnies Lake (p. 66) day- use shelter.

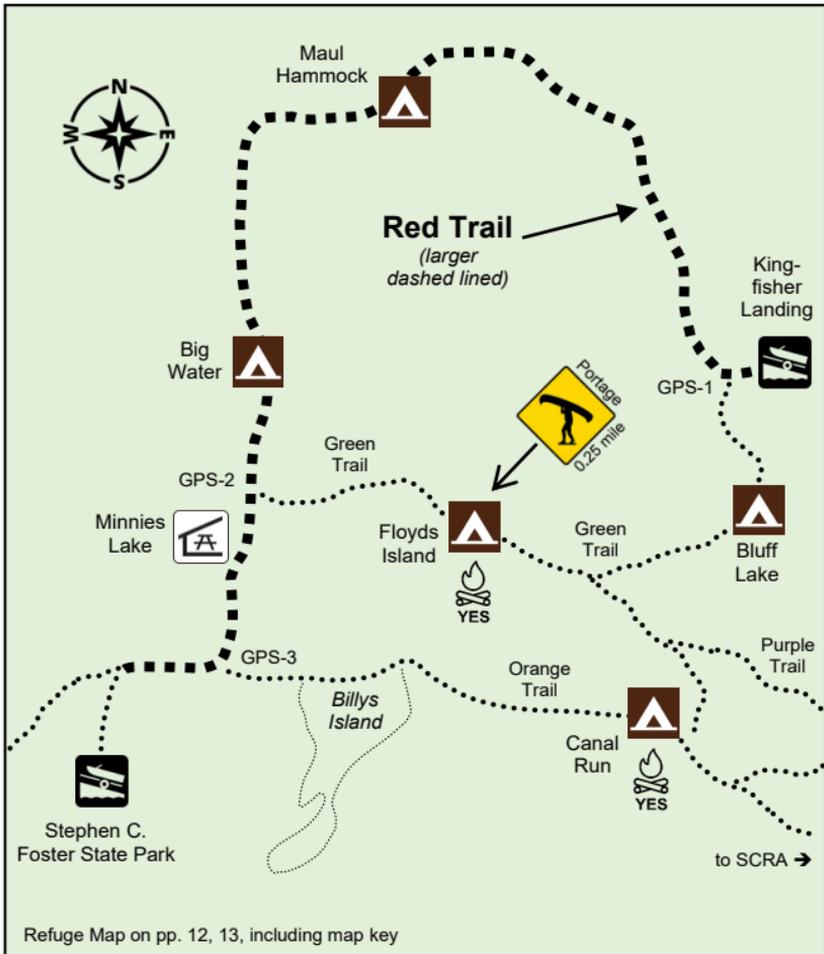

- Current** Generally flows south, in the direction of the Suwannee River.
- Precautions** For experienced paddlers and campers only. Paddling the entire Red Trail requires a minimum of 2 nights / 3 long days. Route: Stephen C. Foster State Park, to Big Water, to Maul Hammock, to Kingfisher Landing.
- Go Big !** Try the ultimate Okefenokee, expedition-level, winter 4 night loop beginning and ending at Kingfisher Landing, by adding the Green Trail. Route: Kingfisher, to Maul Hammock, to Big Water, to Floyds Island, portage across Floyds Island, then on to Bluff Lake, back to Kingfisher. (Note: not allowed during peak season of March 1 - April 30.)

Yellow Trail

Paddled this Trail Date: _____

Kayak angler Harvey Cox on the Yellow Trail, a little north of Cedar Hammock.

General Location	East part of Refuge, begins 1.9 miles from Suwannee Canal Recreation Area.
Connects	Orange Trail / Suwannee Canal with Cedar Hammock camping platform.
Length	2 miles.
Difficulty	Easy.
Features	Prairies, grasslands, very few trees, you'll probably see large wading birds, and maybe an alligator or two.
Shelters	0.9 mile up the trail is the Cedar Hammock (p. 52) camping platform.
Current	Negligible. Closer to the Orange Trail, there can be a slight current south.
Precautions	You are exposed to the elements on this trail; however, Cedar Hammock is not far away.

Map above is not to scale and is for illustrative purposes only.

Canal Run - 5 miles
Round Top - 6 miles
Big Water - 8 miles
Bluff Lake - 9 miles, Cedar Hammock - 13 miles
Mixons Hammock - 11 miles, Coffee Bay - 8 miles

Notes

Camp in the cabin - a unique & enjoyable experience. Crossing the island requires 1,300 ft. / 0.25 mile portage; a portage cart is provided. The portage is not difficult. Has a fire ring for campfires. Note: Vault/pit toilet is on the east side of island near water access.

Using the provided portage cart. It's a 1,300 ft. / 0.25 mile portage across the island.

Raised vault/pit toilet is on the east side of the island near water access.

Maul Hammock Camping

Camped Here Date: _____

Maul Hammock is the most remote campsite in Okefenokee.

General Location North, remote part of the Refuge. See maps on pages 13, 38. Paddling route on page 20.

Trail Red Trail.

GPS Coordinates for Campsite 31°00'58.4"N, 82°15'23.8"W or 31.016233, -82.256600

Type of Camping Wood platform over water. No dry land.

Mileage to Other Points of Interest Kingfisher Landing - 12 miles
Big Water - 9 miles

Camp-to-camp directions on p. 90

For strong paddlers only. The paddle from Kingfisher to Maul Hammock can be a challenge. It's nearly all open prairie and grasslands. This can make the 12-mile haul seem much longer than it already is. There are no rest stops or places to get out and stretch your legs. At night, to the north, you'll see some faint Waycross, GA lights. The campsite has a vault/pit toilet.

Notes

It's a long paddle to Maul Hammock. 12 miles from Kingfisher; 9 miles from Big Water.

Maul Hammock sits in a beautiful lake. Sunset in winter.

Mixons Hammock Camping

Camped Here Date: _____

This is one of only two land-based campsites in Okefenokee (the other is Floyds Island).

General Location Furthest west campsite in the Refuge. Only 2 miles from Stephen C. Foster SP. See maps on pages 12, 25. Paddling route on page 19.

Trail Brown Trail.

GPS Coordinates for Campsite 30°49'26.7"N, 82°22'53.3"W or 30.824083, -82.381467

Best Okefenokee Camping Tips

The Okefenokee National Wildlife Refuge can be intimidating for most newcomers. I've been paddling, camping and exploring for decades, and it was even this way for me when I first started going to the Okefenokee. Over the years, I've learned some tips and tricks along the way, and whenever I take others into the Refuge, I share these.

1. Wash your canoe or kayak before you leave for Okefenokee. This is to ensure you don't bring any evasive flora or critters along with you to Okefenokee's delicate ecosystem. And besides, you feel better when you paddle a clean boat!
2. Have a robust insect repellent plan. Personally, I treat my clothing with Permethrin, bring sprayable DEET, a Thermacell, and a head net. I even treat the head net with Permethrin. Don't take this seriously at your own peril. I do most of my Okefenokee trips in the dead of winter (December through February) and nearly every winter trip, there are mosquitos and other pesky bugs!
3. Bring rope that is not only thick enough to tie your canoe/kayak to the camping platforms, but also to pull your heavy boat with. Some of the trails could have low water (the Green Trail is notoriously low during the winter!); so low that you must get out and drag your boat. It's also a good idea to bring mechanic's style "work" gloves for this. "Muck" boots or tall waterproof hunting boots make this easier as well.
4. Bring a backup paddle. I've snapped two paddles in three decades (never in Okefenokee, thank goodness!) and seen it happen three other times being with others/groups. It is not fun to move your kayak/canoe with half your paddle. Just imagine being 10 miles from the boat ramp, in a loaded boat, in a strange water wilderness, with only half a paddle. I think everyone should carry a backup paddle, but at a minimum, have one for every 3 paddlers in your group. It's not a matter of *if* you'll experience a paddle failure, but *when !!*

5. A wide brim hat and sunscreen are very important. Most of your paddling at Okefenokee has little protection from the sun. Some of the trails are 100% water grasslands/prairies. You won't have any reprieve from the sun on these trails.
6. Bring a footprint or tarp to put under your tent. You'll be erecting your tent on wooden platforms that are uneven, maybe have splinters and are dirty. This will save your tent floor.
7. Non-freestanding tents will not work on the platforms. If you dare bring a non-freestanding tent, you'll have to get very creative in tying off ends that are traditionally staked out.
8. After you erect your tent, always have a good bit of weight in it. Expect high wind gusts on the camping platforms. I once saw a tent launched into the water from the high Big Water platform.
9. Let's talk about drinking and cooking water. First off, filtering/purifying Okefenokee's water is not recommended by the Refuge. This is due to the heavy sediments and high tannic acid. I've tried to filter the water with very high-end backpacking style filters (MSR and Katadyn). Both filters failed in less than 2 liters! Bring more drinking and cooking water than you think you'll need. With that said, always bring an emergency water purification backup plan. For me, that's water purification tablets (my preference is MSR Aquatabs and a couple bandanas). You can drink chemically purified tannic color water in Okefenokee; I've done it twice. It looks gross, but it will get you out of the Refuge without risk of dehydration or sickness.
10. The trickiest part about camping at Okefenokee can often be getting out of your canoe/kayak and up on the platforms; and the same for getting back in your boat. I've seen more than one person tip their boat and go for a swim. Here's a

Best Okefenokee Camping Tips

tip I use on every trip: you know that tie down strap you used to strap your boat to your car rack and drive to Okefenokee? Bring it with you. Most of the platforms have “dock cleats.” Use that tie down strap to wrap it around something in your boat, then to the dock cleat, and then tighten it down so your boat doesn’t move. This works remarkably well. So well, I’ve been able to stand up in my solo canoe and exit the boat. For canoes, wrap the strap around a thwart or yoke. For kayaks, wrap it around the seat support piece that attaches to your kayak. If the platform doesn’t have dock cleats, then wrap the tie down strap around a post or feed it through a gap in between two horizontal boards.

11. I’ve had cell phone service at every campsite except Mixons Hammock (the Stephen C. Foster/Mixons Hammock side of the Refuge is notorious for having no cell coverage). However, cell service can be fickle in Okefenokee. I went on trips in 2023 and 2024 to most of the Refuge and had reliable coverage. But I went back in 2025 and didn’t have cell service at campsites I’ve had for many years. Bottom line: don’t rely on having cell service. If you must communicate with loved ones, a satellite communicator is a great option (and most of them also have a way of triggering an S.O.S. to Search and Rescue in the event of an emergency. E.g.: I use a Garmin InReach).
12. Be extremely careful walking around the wooden camping platforms in the morning. Overnight dew will make them very slippery. The worst is Canal Run, followed by Coffee Bay. Both platforms sit in narrow, shaded sections of the Suwannee Canal (Orange Trail) and it takes a while for the sun to dry them out. And if you’re camping in winter, plan on frost/ice being on the platforms.
